Dear Steve,

I would like to appreciate all the diligent effort that you and your team have put into my school running track from July to October 2020. It was your persistent hard work and professional that has given us an eye-catching design and safe playground which is facilitated our students to do more sport activities eventually. On behalf of school I would like to thank you for your services. I feel grateful to have you as the manager in this project and I treasure your valuable contribution in bringing this project to fruition.

The project has shown your flexibility, dedication and desire to experiment new procedures of well completion under the environmental challenge. Please let your production team know that their efforts are noticed and show benefits to the students. You have managed a great team that provide professional service.

Please accept my sincerest gratitude for your superior work.

Warm regards,

Clifford Tam

Executive School Officer
